Part of the NC AHEC Program

## Target Audience

Post-secondary educators in the following disciplines: physicians, physician assistants, nurse practitioners, pharmacists, psychologists, social workers, counselors, nurses, and other interested health professionals.

## About the Program

SBIRT (Screening, Brief Intervention, and Referral to Treatment) is an approach to the delivery of early intervention and treatment for people with substance use disorders and those at risk of developing these disorders. The purpose of this one-day workshop is to increase the number of SBIRT trainers and trainees in rural and urban parts of south eastern North Carolina. Expert trainers from Duke Medical Center will train 40 faculty members each year from various disciplines. These faculty members will assist in training over 600 students each year from their respective programs. The workshop includes education and practice in motivational interviewing techniques related to SBIRT. The training includes screening, brief intervention, and referral to treatment skills as well as special topics related to SBIRT. All participants must complete online training before and after the workshop.

## Objectives

- Describe the importance of addressing alcohol and drug misuse;
- Examine the evidence base for screening, brief intervention and referral to treatment (SBIRT);
- Explain the rationale for implementing SBIRT in health care settings;
- Discuss and practice each step in the SBIRT model;
- Describe and practice motivational interviewing principles and skills
- Describe and practice strategies for teaching and supervising students in the SBIRT approach.
