### ***Program Description:***

This knowledge-based educational activity is designed to provide physicians, nurses, nurse practitioners, physician assistants, pharmacists, respiratory therapists, and other healthcare professionals with the most current trends and treatment strategies for allergy, asthma and pulmonary patients.

## **Pharmacist Learning Objectives:**

By the end of the conference, participants should be able to:

- Discuss the common masqueraders and exacerbating factors of asthma.
- Review the most recent guidelines for the assessment, evaluation and management of asthma.
- Review the diagnosis, evaluation, treatment and management of allergic rhino conjunctivitis and sinusitis.
- Discuss and debate the symptoms, diagnosis, treatment and management of difficult cases involving asthma and allergy.
- Review the assessment and management of food and GI allergies.
- Discuss the similarities and differences between asthma and COPD.
- Discuss the optimal pharmacologic management strategies of asthma.
- Describe the causes, evaluation and treatment of respiratory symptoms.
- Discuss the presentation, and diagnosis of anaphylaxis and its variants.
- Review the evaluation of patients with repeated infections.
- Describe the evaluation and management of hypereosinophilia.
